

# How To Share and Distribute Your App

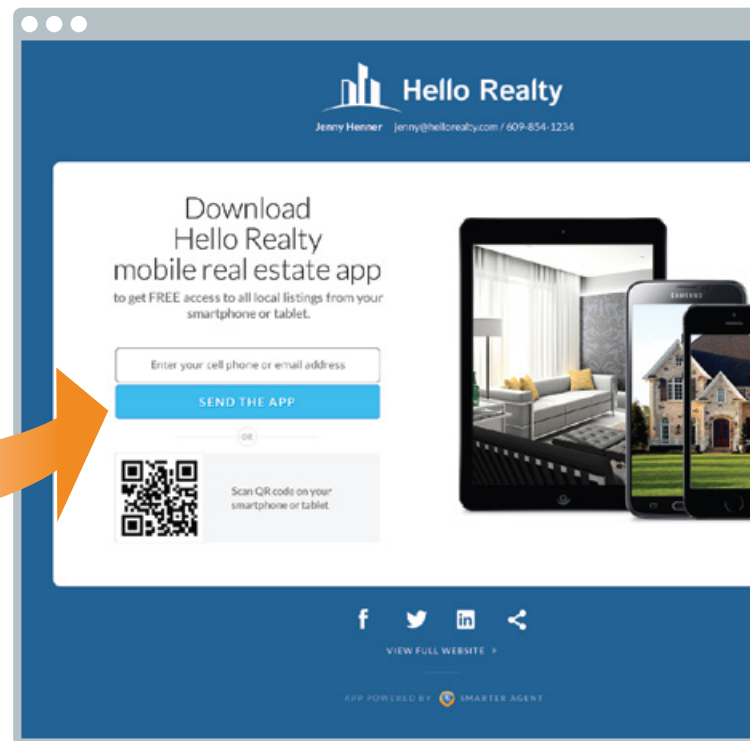

The best way to get leads from your app is to share it with your prospects and clients.

In turn, they share it with their family and friends, growing your repeat and referral business in the process!

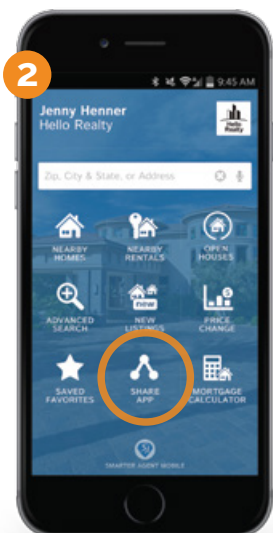

Here are 4 ways to share your personal branded app:

**1** Personalized URL  
[App.hello.com/hrjenny](http://App.hello.com/hrjenny)

Add your personalized URL to your email signature block, your marketing materials and social media posts so anyone can get to your mobile engagement page and download your app.

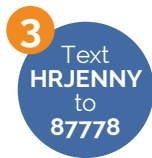

Engagement Page

**2** **Send the app to any cell phone user**

Use the "Send This App" feature located on the main screen of your app to share the app with another cell phone user. People using your app can also use this feature to share your app with others!

**3** **Your Unique App Code**

Anyone who texts your app code (HRJENNY) to 87778 will get a text message back with a link to download your mobile app.

**4** **Your QR Code**

Can be added to any ad, signage, or other marketing materials.
